## Growth Framework

- ❑ Targeting 6-9% average annual revenue growth; organic + acquisition
- ❑ Three avenues of growth:
  1. **Recent Growth Sources** should continue for at least next few years
  2. Implemented a **Growth Identification Process** → to generate profitable growth initiatives in current markets
  3. Utilizing our **Styles of Competition** → to identify longer-term opportunities in new attractive markets

**Enhanced framework for consistent, disciplined long-term profitable growth**

8

# 1. Recent Growth Sources

- ❑ Market growth + **Other Sources**
  - Guiding 6-9% growth in 2018
- ❑ **Other Sources** include:
  - Content gains in Automotive and Bedding
  - Adjustable Bed share gains and market growth
- ❑ Program awards, customer focus, consumer preference trends support growth for at least the next few years
- ❑ Acquisitions should also contribute to growth
  - Averaged ~2% acquisition growth over past several years

9

# 2. Growth Identification Process

- ❑ Implemented **Growth Toolkit** to generate profitable growth initiatives in current markets
- ❑ Toolkit framework:
  1. Analyze our current markets and define attractive spaces for growth
  2. Identify specific opportunities within spaces of interest and prioritize based on potential for value creation
  3. Determine action plans, including both **Organic** and **Acquisition** initiatives

10

# 3. Styles of Competition

- ❑ Defines and measures “**fit**” based on fundamentals of where and how we currently compete
- ❑ Lens used longer term to identify, screen, and pursue opportunities across **more diverse and faster-growing markets**
- ❑ Leggett’s predominant style is **Critical Components**
  - ~60% of sales; typically higher margins/returns
  - Majority of recent sales growth
- ❑ Precision Hydraulic Cylinders acquired January 31, 2018

11

# PHC Acquisition

- ❑ PHC annual revenue of ~\$81 million; slightly EPS accretive
- ❑ Formed new growth platform in Hydraulic Cylinders
- ❑ \$5 billion addressable market; primarily construction equipment, material handling, and transportation
  - Global market growth ~5%+

- ❑ Strong fit with “Critical Components” Style of Competition
  - Highly engineered, co-designed components
  - Long product life cycles
  - Small part of end product’s total cost
  - Many large OEM customers

12

# Acquisition Criteria Unchanged

- ❑ Strategy: clear strategic rationale; sustainable competitive advantage; strong “fit” with L&P
- ❑ Financials: TSR accretive; IRR > 10%
- ❑ **New Platforms**: revenue > \$50m; strong management; subsequent growth opportunity
  - Mkt size > \$250m; growing > GDP
  - Industry EBIT margin approximates Leggett’s average
- ❑ **Add-on** businesses: revenue > \$15m; significant synergy; strategic fit in an existing BU

13

# Sources of Margin Improvement

## Short-Term Opportunity:

- ❑ Recover Cost Inflation
  - 2017/early 2018 margins impacted by RM pricing lag
  - Typically catch up w/ pricing when costs stabilize

## Longer Term Opportunities:

  - Continue to invest in our advantaged businesses
  - Improve or exit low-margin operations
- ❑ **New products** with higher margins
- ❑ Incremental **volume**

# Cost Structure

## Cost of Goods Sold composition (approximate):

- ❑ 55% Materials, composed of:
  - Steel ~25% of RMs
  - Woven & non-woven fabrics ~15% of RMs
  - Foam scrap, fibers, chemicals ~10% of RMs
  - Titanium, nickel, stainless ~2% of RMs
  - Others, including sub-assemblies, hardware, components, finished products purchased for resale, etc. ~50% of RMs
- ❑ 20% Labor (includes all burden and overhead)
- ❑ 25% Other, composed of:
  - Depreciation, utilities, maintenance, supplies -- each ~3% of COGS
  - Shipping/transportation ~10% of COGS
  - Other also includes rent, insurance, property tax, etc.
- ❑ Costs are roughly 75% variable, 25% fixed
- ❑ \$10 million of incremental volume (produced utilizing spare capacity) yields ~\$2.5-\$3.5 million of additional EBIT

31

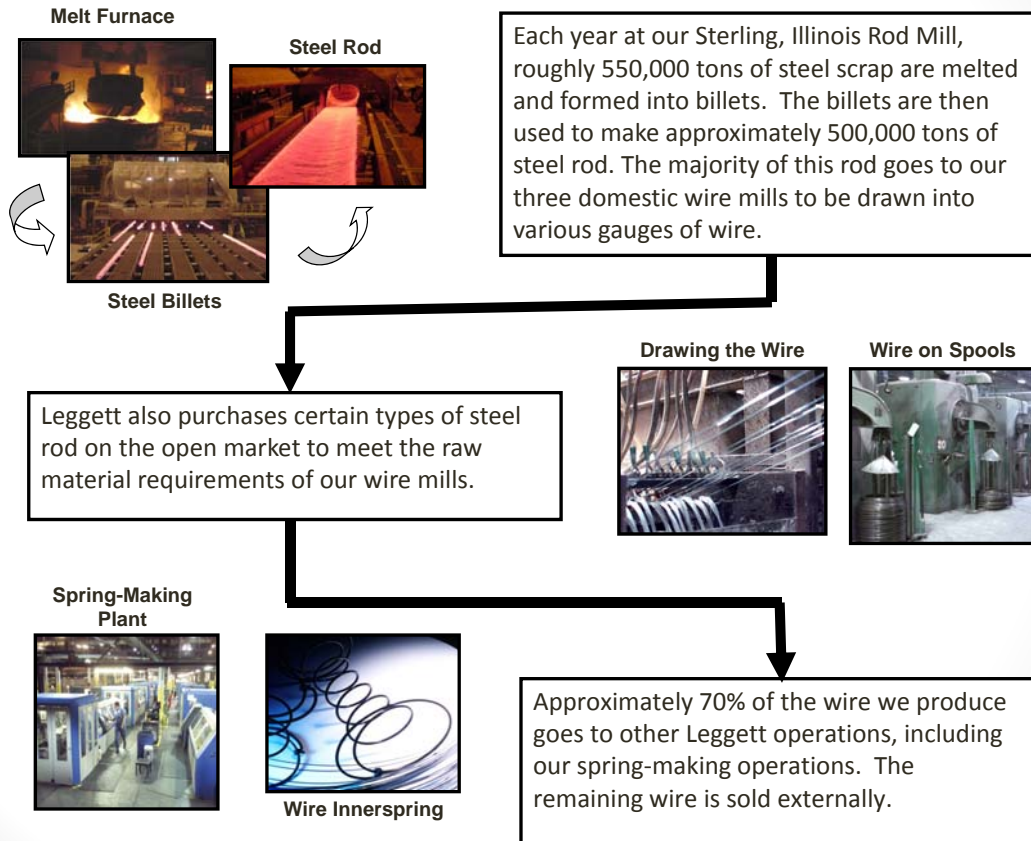

# Commodity Impact

- ❑ Primary commodity exposure is steel; ~25% of RM's
- ❑ Main categories are scrap, rod, and flat-rolled
  - Many grades of scrap, market data is generally available
  - Limited credible data to track moves in other types of steel
- ❑ Impact from inflation/deflation
  - Typically pass through; lag is ~90 days
- ❑ LIFO accelerates inflation/deflation into COGS
- ❑ Changes in metal margin (mkt price for rod - mkt price for scrap) also impact earnings
  - Our scrap cost and rod pricing moves with the market; large swings cause Industrial Products segment earnings volatility

## Non-GAAP Financial Measures

While we report financial results in accordance with accounting principles generally accepted in the U.S. ("GAAP"), this presentation includes non-GAAP measures. These include **adjusted EBIT**, **adjusted EBIT margin**, **adjusted earnings**, and **adjusted EPS**. We believe these non-GAAP measures are useful to investors in that they assist investors' understanding of underlying operational profitability. Management uses these non-GAAP measures as supplemental information to assess the company's operational performance.

Other non-GAAP measures included in this presentation are **net debt**, **net capital**, and **adjusted EBITDA**. We believe the presentation of net debt to net capital provides investors a useful way to evaluate the company's debt leverage if we were to use cash to pay down debt. Our cash has fluctuated, sometimes significantly, from period to period. We use this ratio as supplemental information to track leverage trends across time periods with variable levels of cash. Because we may not be able to use our cash to reduce our debt on a dollar-for-dollar basis, the net debt to net capital ratio may have material limitations.

We also believe the presentation of debt to adjusted EBITDA provides investors a useful way to assess the time it would take the Company to pay off all of its debt, ignoring various factors including interest and taxes. Management uses this ratio as supplemental information to assess its ability to pay off its incurred debt.

The above non-GAAP measures may not be comparable to similarly titled measures used by other companies and should not be considered a substitute for, or more meaningful than, their GAAP counterparts.
